

ENVIRONMENTAL POLICY STATEMENT

The Company recognises the need to operate the business in a manner that reflects good environmental management. The Company is aware of the environmental impacts of its operations and will balance its aims with the need to protect both the local and global environment.

The Company is committed to providing the necessary financial and personnel resources to fulfil the Company environmental policy.

The Director with responsibility for Safety is personally accountable for the environmental performance of the Company and the Director signs this policy in acknowledgement of this overall duty.

The Company is committed to preventing pollution, to minimising its environmental impacts and to developing a culture of continual environmental improvement by establishing clear set environmental objectives and targets within the framework of an environmental management system.

The Company will seek to comply with all relevant environmental legislation and, where practicable, will strive to achieve environmental performance, which are better than legal minimum.

The Company will develop environmental performance evaluation procedures and will periodically review its environmental performance. Furthermore the Company will incorporate environmental factors into business decisions.

The Company is committed to exploiting environmental opportunities by active resource management (materials, fuel and energy) and waste minimisation.

The Company will endeavour to use sustainable materials and products that are reusable or can be recycled. Where necessary it will ensure that all waste, particularly hazardous waste such as contaminated spoil, are tested, transported and disposed of in an environmentally acceptable manner, in accordance with statutory duty of care requirements.

During construction activities the Company will take action to minimise noise levels, traffic nuisance, emission of pollutants and disturbance to the public and local ecosystems.

The Company will minimise the risks of environmental accidents through the adoptions of appropriate risk management procedures. In conjunction with appropriate authorities it will establish emergency response procedures to deal with accidental pollution.
